About the course

Explore strategies to strengthen the resilience of tropical landscapes by restoring trees, forests, and ecosystem services.

This online course, offered by Yale's Environmental Leadership & Training Initiative (ELTI), combines basic concepts of forest restoration and agroforestry with inspiring examples of restoration in practice from around the world. Learn how to plan, implement, and manage restoration and agroforestry systems as part of a broader effort to restore tropical forest landscapes.

The course includes contributions from speakers worldwide and offers opportunities to interact with ELTI's staff, partners, and network of global environmental leaders. Expand your knowledge and develop practical skills that can be applied to your own social and environmental contexts.

Course structure

The course content is divided into five weekly modules:

Week 1: Ecological principles and the context for forest and landscape restoration

Week 2: Sociocultural and political aspects of restoration

Week 3: Effective forest restoration practices and approaches

Week 4: Agroforestry and on-farm restoration strategies

Week 5: Silvopastoral systems in the context of forest landscape restoration

Each week, you can learn at your own pace via videos, readings, discussion forums, and other online materials. Come together to exchange experiences and connect with ELTI facilitators and guest speakers during weekly live sessions.

Optional project

Participants who wish to apply the concepts learned in the course to a real situation can develop an **optional project**. Participants who pursue this option submit a project document at the end of the course and receive personalized instructor feedback to improve their projects.

Registration

Register by October 1, 2021 to secure your spot:
<https://elti.yale.edu/events/restoration-agroforestry2021>

The registration fee for this course is \$500 USD, which includes:

- 🌿 Access to videos, case studies, and readings by global experts at Yale and other world-renowned institutions.
- 🌿 Facilitated opportunities for networking and learning with instructors and peers.
- 🌿 Individualized feedback on an optional personal project.

Participants who successfully complete the course will receive a certificate of participation.

Past participants of ELTI courses are eligible for an alumni discount. Contact us for more information.

About ELTI:

Founded in 2006, ELTI is a capacity development initiative of the Yale School of the Environment. Our mission is to empower people from all sectors and backgrounds to restore and conserve tropical forest landscapes using strategies that support biodiversity and livelihoods. We take a unique approach to capacity development for conservation and restoration by mentoring and supporting people who manage and influence these landscapes in tropical Asia, the Neotropics and tropical Africa. Many of our 8,000 alumni have gone on to become innovative leaders. For more information, visit: <http://elti.yale.edu/>
